and Friday.

Elks Road Race

July 1st

One of the biggest features at the July 1st celebration this year at Champion will be the first of an annual Elks wheat belt Road Race sponsored by the Champion and Vulcan Elks lodges. The distance will be two miles and every boy 15 years and under will be eligible to enter. A lovely silver cup suitably engraved will be given to the winner each year and medals to the 2nd and third contestants. All entrants must reside in B.P.O.E. District No. 14.

Elks Picnic

Well Attended

The Elks again lived up to their name in sponsoring a picnic at Lake McGregor on Sunday, June 3. The weather was not of the best, the day being rather cool, which lessened the number of people attending. In all there was a very good turnout, about 300 people from Champion, Lomond, Travers and the Lake district.

Baseball was the main sport issue of the day. At 1 p.m. the Lomond and Lake McGregor juniors played, the Lake team winning by a decided margin. Next Lomond and Lake McGregor seniors played a scheduled league game, Jack Steeves hurling the McGregor team to victory by a score of 9-6. During this game Champion and Lomond played softball, it being a walk away for Champion, who had much better team work.

At five o'clock Champion played the McGregor team for the honors of the day. Ferguson and Watts comprised the battery for Champion, Root and Matlock for McGregor. The fielding of R. Latiff, P. Bastin and F. Bouzian was worthy of note; also the hitting of F. Watts and J. Kulpas.

One casualty meted the day. D. Campbell on first base for Champion was hit in the eye by a low thrown ball and had to retire to receive medical aid.

The game wound up 7-3 in favor of Champion. A disastrous 7th inning prevented a shut-out for Ferguson.

As for the fishing, there were more suckers on the bank than in the water, which is enough to say for that part of the day.

A good time was had by all and everyone is looking forward to another Elks picnic.

An untimely and sad death occurred on Thursday evening, May 31, when Gertrude Smith, aged two years and seven months, youngest daughter of Mr. and Mrs. Howard Smith, Jr., passed away. The little girl took ill Thursday afternoon, Thursday evening it was found, after medical examination, that an operation would be necessary. The child died in route to Vulcan hospital.

Besides its mother and father it leaves one sister, Doris, and a brother, Kenneth. The funeral was held Saturday afternoon from the church. A large number attended.

Mr. and Mrs. Schultz of Brant have taken up residence in the house owned by Dr. Harper. Mr. Schultz is in charge of the Western Canada elevator.

Champion District

Drenched With Rain

Rainfall for the past few days in this district totals 250 inches and farmers and stockmen are jubilant. More moisture is promised as skies are still overcast. The rain will bring back drooping crops while grazing areas are already showing the deep green tinge in contrast to the browning grass of a week ago. Farmers who were despairing of a crop are not worrying now. Some little damage was expected to wheat which had reached the shot blade, but late sown crops were assured for the critical period. Millions of young grasshoppers in the south and east were killed in the cold and rain.

Meeting of W. I.

Tuesday, June 12

The June meeting of the Champion W. I. has been invited to meet at the home of Mrs. McLean. Mrs. Hagerman the Constitutionary Convener will be present. The roll call is "Canadian Industries". The program is in charge of Mrs. Ulrich. The lunch convener being Mrs. Hummel.

Former Pastor's

Child Dies

Rev. Stanley R. Hunt, now of Chalmers, seven miles north of Grande Prairie, but well known at Champion and Nobleford, where he served in the pastorate, had a trying experience on the closing day of the recent united church conference held in Edmonton. His wife had sent him a message that their little girl was seriously ill with pneumonia and to come at once. He chartered an aeroplane from Edmonton at an expense of \$270 to convey him to the bedside of his little daughter, but she was dead when he arrived.—Lethbridge Herald.

Champion Enjoys

Symphony Program

The concert given by the Vulcan symphony orchestra on Friday was not only a decided success, but one of the finest ever presented in Champion.

The orchestra, numbering 14, rendered some very fine selections. Among the assisting artists were Miss Hartwig, whose beautiful singing thrilled the audience. Miss Gladys Hinder, with violin selection and Miss Beverly Roberts of Barons, whose ability as an elocutionist and vocalist is outstanding. George Campbell acted as chairman.

Mr. Fred Gottenberg has as his guests this week a brother and his wife, Mr. and Mrs. Frank Eller and son of San Francisco, her mother, Mrs. Eglar of Julietta, Idaho, a sister, Mrs. Moll Miller, her daughter Lule and son Alfred of Julietta, and a sister, Mrs. Walker Felton of Pierce, Idaho. Mrs. Gottenberg's mother has visited her before but it is the first time that the rest of the family have ever been in Canada.

The Best Place in Town to Eat

With the approach of the busy season we are prepared to cater to farmers and others with quick courteous service

--- We Appreciate Your Patronage ---

Cigars, Cigarettes, Tobaccos, Soft Drinks, all Kinds of Fruit in Season, Ice Cream the Year Round, etc.

Local & General

Luscious Strawberries and Cream. 2 boxes berries and a bottle of real cream all for 35c at Campbell's.

Cabbage, Cauliflower and Tomato Plants by the dozen or hundreds at Campbell's.

Mrs. G. Mallory formerly of Kirkcaldy and sister of P. M. Patterson passed away in a Toronto hospital recently.

Mrs. E. Neilson and daughter Zoon of Calgary were week end visitors at the home of Mr. and Mrs. F. J. Clapp.

Still time to plant garden seeds. Get them in bulk at Campbell's.

The marriage of Miss Opal Huts to Mr. Welsh of Nobleford was solemnized recently. Miss Huts is a sister of Mrs. Wayne Anderson.

Gentlemen where crossing the street in muddy weather should be more careful. For further particulars see Bobby McCullough.

Divine service will be held at Wetwood Thursday June 14th, at 8.30. Fireguard Sunday, June 17th at 3.30.

Now booking Strawberries by the case. Finest fruit and the price will be right at Campbell's.

Mrs. McKibbin and Miss K. Watkins spent the week end visiting at their home here.

Mrs. D.D. Farmer had as her guests this week Mrs. Rita and Miss Jenith Ritz of Trochu, and Mr. and Mrs. Steadman of Calgary.

Miss Cliffland, accompanied by Mrs. Latiff and Mrs. Gatenby motored to Lethbridge Wednesday to attend the evening session of the Grand Chapter O. E. S.

Local & General

Among those leaving Monday to attend the Grand Chapter O. E. S. in Lethbridge were: Mrs. A. W. Jopling, Mrs. Harry Smith, Mrs. W. A. McIntyre, Mrs. Ella Beaulieu, Mrs. R. A. Clements, Mr. and Mrs. Collins, Mr. and Mrs. Orr, Mr. and Mrs. Guy Volsey and Mr. J. O. Bell.

Mr. and Mrs. Dawson of Edmonton were the house guests of Mrs. Ella Beaulieu over the week end. Mrs. Dawson is the worthy Grand Matron of the Grand Chapter of Alberta O. E. S.

The Ladies' Aid met Thursday at the home of Mrs. Fred Clever, when a very large crowd were in attendance. It was decided to hold the annual bazaar this fall, part of which will be held in the form of an auction sale. A very pleasing program was rendered during the afternoon in which Mrs. Dawson gave a reading and the little Misses June, Betty and Phyllis Ashmore and Dora Miller sang a song. Mrs. Clever, assisted by Mrs. W. A. McIntyre served refreshments. The next meeting will be held at the home of Mrs. Norman Patterson, when refreshments will be served by Mrs. Patterson and Mrs. Bond.

Mr. and Mrs. R. C. Crane and Dorothy have just returned from a trip to Logan, Utah, where they attended the commencement exercises of their son who has just graduated in civil engineering. Spike started his education in Champion, took his high school in Calgary, then this degree in Logan Utah.

Mr. and Mrs. Don Faber of Ashland, Oregon, who have been the guests of Horace Johnson at Okotoks, were week end visitors in town. Mr. Faber was formerly Miss Leola Johnson.

Thrifty Housewives Buy Quality

That "Bought And Paid For" Idea

There is a curious persistence in the idea current in certain parts of Eastern Canada, that the older provinces of Confederation have proprietary interests in the prairie provinces by "rights of purchase".

Just recently, a storm which ranged West against East, broke in the House of Commons at Ottawa, when relief and other expenditures required by Western Canada were under consideration. During the discussion, the "bought and paid for" mentality was prominently in evidence, according to newspaper despatches. It appears inevitable that, when any expenditure which may be construed as exclusively Western, is mooted in the prairie parliament, some member from one of the older provinces, impelled by this idea, seems bound to object on the ground that the prairie provinces are not entitled to further consideration—and terms such as "blood-suckers" are applied, indiscriminately and with reckless abandon, to governments and people of the West.

Forgotten in the heat of debate is the amazing part which the West has played in the material advancement of the Dominion. Forgotten, for the time being, is the gigantic contribution which the wheat-growing prairies have made to the wealth of Canada. Forgotten are the tremendous expenditures made, by the Dominion as a whole, for works, projects and purposes which may be construed as exclusively Eastern. Forgotten is the use made of the resources of the West in the building of great transportation systems of advantage to the whole of Canada. Forgotten is the influence of prairie purchasing power upon the industrial development of the East. Forgotten, in the fact that the West has been the source due to the dire extremity of many of its people—a condition they certainly did not seek and did nothing to create. The "right of purchase" idea reigns paramount over all others when tempers are frayed and local zeal is in the ascendency. In one breath it is admitted that the prairie section has contributed more to the wealth of Canada in a specified period than any other component part of the Dominion. In the next, the prairies are branded as "blood-suckers", draining, as it were, the coffers of Canada which, by implication, apparently are filled solely by the contributions made by the older, Eastern provinces.

The idea, of course, has its roots in the historical charter granted by Charles II. of England, in 1662, to the Hudson's Bay Company, which conferred upon that company "rights in the territory tributary to the river draining into the Hudson Bay"—including property rights and rights of government. These rights the company exercised in the territory known as Rupert's Land for some two hundred years.

When, however, Confederation became an accomplished fact in 1867, the Canadian Parliament, pursuant to the great vision of a united Canada stretching from ocean to ocean, initiated negotiations with the Imperial Government at London with a view to acquiring possession of the territory held under this charter by the Hudson's Bay Company. The British Government agreed to the request, on condition that the arrangement entered into would not involve expenditure by the Imperial Treasury, and on the further condition that there should be no surrender of territory until the terms had been agreed upon.

Negotiations with the Company proceeded for two years, during which time it held out for a cash payment of \$200,000 (approximately \$2,500,000), as one of the terms under which it was prepared to relinquish its rights in the territory. The Canadian Government, then representing the original provinces of Confederation, borrowed the money on bond, and the purchase was matured in 1904. The money being paid, the Company surrendered its rights under the charter, and Canada stretched one and indivisible from the Atlantic littoral to the Pacific seaboard. That is the story, that the genesis of this "bought and paid for" idea which crops up, ever and anon, during debate in the federal parliament.

Obviously, \$1,500,000 is a ridiculously small sum against which to cause a claim of proprietary rights of purchase in the entire prairie section of Canada. It is ridiculous to insist on property in the western prairie produced normally each year in the far-flung wheat field of the West. It is ridiculously small not only in proportion to the contribution made by the "purchased" territories to the aggregate wealth of the Dominion. It is ridiculously small in comparison with the annual contributions made by the Western provinces to the revenues of Canada. That the idea should survive at all in the face of recent history is incomprehensible to Western minds. That it should be used to justify equal treatment of the people of certain sections of the prairies far in their extremity, demonstrates not only the mental poverty of the objector, but a naive ignorance of obvious facts. Recent economic experience has proved that, instead of the East holding the West in fee, the reverse is closer to the truth.

Italy To Build Battleships

Three Large Fighting Ships To Be Built Under Vashon Treaty

Italy will construct three large battleships, with general specifications similar to those of the French battleship Duguesne. It was disclosed by naval officials.

The new vessels will be completed by 1940 and will cost about \$85,000,000. Their construction is part of a program outlined by Premier Mussolini in an address before the chamber in which he stated that Italy proposes to utilize the \$100,000,000 tons allowed Italy under the Washington treaty.

The premier estimated the expenditure will total 1,500,000,000 lire. This capital expenditure will be in addition to appropriations to modernize old battleships between now and 1940.

Household Drudgery The Bane of a Woman's Life

Nature intended women to be strong and healthy and active and lively, but few can do so unless they have good health when she has to go through the household drudgery without any relaxation. It is no wonder for she becomes nervous and irritable, has less sleep, faint and dizzy spells, shortness of breath, nervous and smothering sensations, and can't sleep at night.

Women who are weak and run down will find in Milburn's H. & N. Pills a remedy to strengthen the system and bring back the much desired health.

World's Largest Flying Boats

Russia Leads With Britain Second And United States Third

Everything else airplanes are becoming larger and more powerful. The honor of having the biggest goes to Russia.

The Russians have almost completed at Moscow a flying boat—it might be called a flying liner—to be named the "Maksim Gorki". It will provide accommodation for 70 passengers, and will have a crew of six. It will have a moving picture "auditorium", and a room for developing photographs. The pilot will sit in a conning tower above the wings so that he will have an uninterrupted view of the great Britain furnishes the second largest, the "Sylla", which is almost ready. It will carry 30 passengers and a crew of five. Among other things it will have a smoking compartment.

The United States comes third with the S-42, built at Bridgeport, Conn. by the Sikorsky Company. It carries 32 passengers and a crew of five. It has a full-load range of 1,250 miles non-stop, and can also carry 1,000 pounds of freight.—St. Thomas Times-Journal.

"PERSONS NOT FAT LIVE LONGEST"

Eminent Physician Declares

In a recent lecture before the American Academy of Medicine, a leading physician of the West stated that persons who aren't fat live the longest.

Common sense confirms this. Insurance companies often reject overweight applicants, and the reason is not on account of the risk. Fat crowds and weakens body organs—it slows up blood and puts undue strain on the heart. A host of other ailments, such as indigestion, shortness of breath and lassitude are often associated with fat.

To get rid of this dangerous, unhealthy fat, there's no reason why you shouldn't use the dieting pills you see this safe, effective treatment—half teaspoonful of the dieting pills in a glass of hot water first thing every morning.

This "dieting" "little daily dose" of Kruschen keeps the system free from harmful toxins, it helps to re-establish normal and proper body functioning—it keeps you feeling fit and fit it all time. Energetic activities takes the place of sluggish indolence while you see excess fat gradually melt away without discomfort.

Vaccine For Tuberculosis

New Preparation Being Tested On Cattle In Ireland

Experiments to find a cure for tuberculosis in cattle continue in various parts of the world. The Spahlinger vaccine, of which much has been heard for many years, is still undergoing tests, the most recent of which have been made in Northern Ireland under official auspices. The calves vaccinated with the Spahlinger preparation have survived the injection of heavy doses of tubercle bacilli, and are thriving, while untreated calves have succumbed.

As the United Kingdom is now carrying out a national campaign to clean up her dairy herds and to eradicate tuberculosis, the final results of the Ulster trial seem likely to offer an economical and practicable means of immunizing dairy cattle against tuberculosis and gradually rid the country of a scourge which is costly to public health and farmers.

Dwarfs Holding Congress

Likely To Take Place In Budapest Next Year

Fired by the Nazi doctrine of racial purity, dwarfs of Hungary have formed a National Union of Hungarian Dwarfs and have invited all the dwarfs of the world to a Dwarf Congress which is to be held, probably in Budapest, next year. Their creed is to "preserve the purity of the dwarf race and to enter into marriage with normally-sized people, and to demand lower fares and smaller houses for all the folk. Their leader, their Hitler, is said to be 20 inches tall.

Invention For Food Fans

Dr. Nevil M. Hopkins, of New York University, is the inventor of a new electrical device which he claims will revolutionize the radio-casting industry. He calls it the "televotor" and by use of this invention, a listener on a broadcast can, by pressing a button, immediately transmit to the station his reaction to the program being presented.

All tree squirrels make nests of twigs and leaves among tree branches.

Fulfilling Father's Hopes

Captain Scott's Son Makes Study Of Natural History

Twenty-two years ago Captain Scott, one of the greatest English explorers of all time, lay dying in a tent in the Antarctic.

That letter he wrote was to his wife. He spoke of their infant son Peter. "Make the boy interested in natural history if you can," he said. "It is far better than games."

Peter Scott is 24 now. He has fulfilled his father's hopes. Recently he opened in London, for the first time, his second exhibition of paintings of bird life.

The grey light of dawn is there; so are the mudflats, the algaean creeks, the ebb of the tide, and eerie, plaintive noises. The curlew calls; you can hear the piping of awkward black and white. For the moment, the seabank and stint. Grey geese rise V-shaped into the sky and flight shoredward to the fresh marshes of the estuary.

It is a world of thrills to the mere wildflower. It is a world of excitement to the wildlife-naturalist, which is what Peter Scott has become.

He shoots little now, as he said recently, but in a scooped-out hole in the salt, or huddles in a pit in the salt marshes, waiting to catch the fleeing viscous he has captured in paint.

The Grasshopper Campaigns

Provincial And Federal Organizations To Deal With Menace

The Canadian Insect Pest Review for May of the Dominion entomological branch in the 1933 summary of insect outbreaks of that year states with reference to grasshoppers that cases of campaigns involving the use of poisoned baits were actively carried out in most areas, and, despite many difficulties, resulted in the destruction of vast numbers of grasshoppers and the material saving of crops. In July and August, extensive dispersal and control of grasshoppers occurred in many parts of the infected region. As a result, practically all of the open prairie land of the three Prairie provinces is now involved, and the areas of severe infestation have been considerably reduced, except in Eastern Manitoba where there was an encouraging retraction. It is expected that during 1934 the outbreak will be even more massive and destructive than that of 1933, and consequently Provincial and Dominion authorities are organizing a comprehensive campaign to deal with it.

Dredging For Gold

Work To Be Started On Jugoslav-Rumanian Border

Modern miners are to attempt to dredge the River Pék on the Jugoslav-Rumanian border, the bed of which gold has been collecting for more than 2,000 years. Up this river sailed Jason and his Argonauts from the ancient world. The Golden Fleece of their quest is no legend today, for the peasants of the Pék River Valley have been digging the bed of the river and have found gold in water and after a few weeks pull out golden fleeces, the alluvial gold brought down from the mountains by the water having settled in the mud. It was here that Alexander found the gold for his expedition in 328 B.C. Firms of many nations have made bids to supply the dredging of machinery and the operations are expected to be extensive.

A Closely Guarded Secret

Germany is closely guarding its experiments with radio-controlled airplanes. It is reported that successful flights were made by a machine entirely without a crew, direction being entirely by radio. The tests were made under a strict secrecy, and officials refuse to divulge any information.

"Too bad about Jane and the man she's engaged to. Neither one of them is good enough for the other. "Where did you get that idea?" "I've been talking the matter over with both families."

The world is wide, but there are lots of narrow people in it.

Minard's Corns & Warts Ointment. Lift right off. "KING OF PAIN".

BIG SIZE BIG VALUE BIG SATISFACTION

If you want the most pleasure, chew—

BIG BEN THE PERFECT PLUG Chewing Tobacco

Still Works At Ninety

Blacksmith Not Idle Even If Son Runs Business

Partnership of Kemp and Son, village blacksmiths at Worthington, worth, England, has been, to quote the official notice, "dissolved by mutual consent," but a man who worked hard as a blacksmith even in his ninetieth year will not be altogether idle. For the moment, the opinion that his wife, James, was old enough to carry on. Samuel Kemp, however, does not intend to retire, "because," he says, "you can't trust these boys." He has finished 78 years continuous work at the forge. Up to the time the official notice of the dissolved partnership was published he was using a sledge hammer. Next day he was soldering kettes.

Canada's Agricultural Revenue

Decrease Last Year Of Over Four Million From Previous Year

The total gross agricultural revenue of Canada for 1933 is estimated at \$762,924,000 as compared with revised estimates of \$766,794,000 for 1932, and \$856,114,000 for 1931. This represents a decrease of \$149,200,000 or 6.8 per cent, and \$192,170,000 or 25 per cent, from the revenue from farm animals, wool, dairy products, fur farming, honey, clover, and grain and the decrease of \$149,200,000 from field crops, fruits and vegetables, poultry and eggs, maple products, tobacco, and fax fibre. The greatest increases are from farm animals and dairy products, while the biggest decreases in revenue are shown in feed crops and poultry and eggs.

Greatly Increased Riches

Higher Gold Price Made Vast Difference To Indian Prince

It is due largely to President Roosevelt that an Indian prince, the Nizam of Hyderabad, is much richer than he was a year ago. Locked up in his strong-room is a vast store of gold and bullion. Only last year its value was estimated at \$500,000,000. Since the price of gold has increased about 60 per cent as a result of the action of the United States in fixing a higher price for gold, the Nizam's hoard is now estimated worth \$800,000,000.

Has Regular Zoo

Pity the professor who breaks into the room of Kenneth Johnson, University of California student. Johnson, who aspires to be a zoo keeper, keeps eight snakes, a black widow spider, and a Gila monster in his bedroom. The pets have the run of the bedroom. Johnson studies the best way to make them happy, and answers their intelligent questions by running them through mazes.

Good Friend To Horses

When William M. Woodcock presented John Hill, a grocer, for cruelty to a pony he made the 1933-34 equine he had befriended in court. Woodcock has been on the London force for 20 years. A lover of horses, he watches for cases of cruelty and brings the offenders before the law.

Dreams Of A Startling Future

Nicola Tesla On Verge Of Announcing New Discoveries

It is all very hazy, of course, but when Nicola Tesla says he "is on the verge of announcing a new invention of incalculable benefit to the world," the world is warranted in sitting up and listening. For the moment, it is to be considered as an indication of the wonders he may perform in the future. The Italian genius, indeed, is prepared to startle the world with four new inventions which are likely to provide him with many millions. With these millions he will proceed to put some of his earlier discoveries on a commercial basis. Chief among these, we take it, he rates the transmission of power by wireless. . . . Tesla remarks that with his discovery put on a commercial basis, the flying machine of tomorrow, freed from the gasoline motor, will have unlimited cruising range by drawing on transatlantic power. And, of course, that would be only one of many possible wonders. Electricity reduced to terms of power already known to our daily lives in so many forms that the field awaiting development of Tesla's wireless power transmission is practically without limit. So, although, as we said at the outset, the Tesla announcement is somewhat hazy, it is clear enough to startle vivid dreams of a startling future. — Buffalo Courier.

Belgium Looking To Her National Defense

Joins Countries Who Have Given Up Disarmament Idea

Add Belgium to the list of countries, large and small, which have abandoned all talk of disarmament and are concentrating on the reverse. In Belgium the chief political issue just now seems to be the exact nature of the policy of national defense which shall be adopted. Within the past year and a half this small power has spent no less than \$50,000,000 defending its German border.

Thus Europe marches toward the ideal of bigger and better armaments. It may in the end mean death to a great many, but in the meantime, it is at least helping the armament concerns to maintain production at a satisfactory high level.

Islands in a river, unless caused by rock outcrops, are continually traveling downstream as the current cuts at the upstream end of the island and deposits at the other end.

There never yet was a worm that beat a good couple.

 ion visitor this week.

Al. G. Barnes Circus
 in Lethbridge June 14

Get ready! The Circus is coming!
 The Al. G. Barnes show, one of the
 world's largest, will exhibit in Leth-
 bridge on Thursday, June 14.

Three special trains are used this
 season to transport this great organi-
 zation from city to city. Traveling
 with the great organization are 1,000
 employees in addition to 108 advance
 men. Twenty-two tents covering
 twelve acres of ground house the trans-
 parent city in the daytime. The circus
 has its own doctor, lawyer, dentist,
 U. S. Postman, detectives, blacksmith,
 carpenters and, in fact, every action
 in the average small city.

The famous Al. G. Barnes menagerie
 declared to be the finest and most
 complete traveling zoo in the world,
 is a part of the show. Many new,
 rare and costly specimens of the wild
 animal kingdom have been gathered
 from all parts of the globe. Tapirs,
 goats, Vasek Varks, lions, tigers,
 camels, dromedaries, zebras, leopards,
 panthers, yaks, emus, jaguars, elands,
 seals, and three herds of elephants are
 but a part of the traveling university
 of natural history.

The wonder spectacle of all time,
 the "Fiesta of the Rio Grande," a
 gorgeous procession of floats of old
 Spain, is used this season as a prelude
 to the circus proper. More than 1,000
 men, women, horses, camels and
 elephants take part in this never-to-
 be-forgotten pantomime of enchant-
 ment.

Performances will be given at 2 and
 8 p.m. Doors will be opened an hour
 earlier to permit an inspection of the
 zoo or to enjoy a concert of popular
 and operatic music by Prof. Redick
 and his military band.

Attention! O.O.R.P.

The June meeting of the O.O.R.P.,
 which was postponed on account of
 weather conditions, will be held in the
 lodge rooms on Tuesday evening of
 18th. You are urgently requested to
 attend.

MARGARET McRAE,
 Secretary.

Village of Champion

NOTICE

To all owners and tenants in the
 Village of Champion, notice is hereby
 given that all ashes, refuse etc., must
 be cleaned up and hauled away, be-
 fore the 15th day of May, 1924.
 By order of The Village Council.

Keeping Up Quality

The reputation of Canadian wheat on the
 markets of the world is due to the efforts
 western farmers have made to keep up the
 quality of their production.

And the reputation of United Grain Growers
 is similarly based on unremitting efforts to keep
 up the quality of its service to farmers in
 handling their grain and furnishing them with
 farm supplies.
